

CORRIGENDUM

PEARLS Randomized Lifestyle Trial in Pregnant Hispanic Women with Overweight/Obesity: Gestational Weight Gain and Offspring Birthweight [Corrigendum]

Trak-Fellermeier MA, Campos M, Meléndez M, et al.
Diabetes Metab Syndr Obes. 2019;12:225–238.

On page 225, Abstract, Results subheading, “Although not statistically significant, women in the intervention group (6/15) were 1.7 times more likely to achieve appropriate weekly GWG until delivery when compared with controls (4/16 women) (adjusted incidence rate ratio = 1.67; 95% CI: 0.40, 6.94).” should read “Although not statistically significant, women in the intervention group (6/15) were 1.7 times more likely to achieve appropriate total GWG until delivery when

compared with controls (4/16 women) (adjusted incidence rate ratio = 1.67; 95% CI: 0.40, 6.94).”

Appropriate GWG (baseline to delivery) section, 2nd to 4th line on page 230, “Forty percent (6/15) of women in the intervention achieved appropriate GWG/week compared with 25% (4/16) in the control group.” should read “Forty percent (6/15) of women in the intervention achieved appropriate total GWG compared with 25% (4/16) in the control group.”

The authors apologize for not noticing the inconsistencies between the text and Table 3 earlier.

Diabetes, Metabolic Syndrome and Obesity: Targets and Therapy

Dovepress

Publish your work in this journal

Diabetes, Metabolic Syndrome and Obesity: Targets and Therapy is an international, peer-reviewed open-access journal committed to the rapid publication of the latest laboratory and clinical findings in the fields of diabetes, metabolic syndrome and obesity research. Original research, review, case reports, hypothesis formation, expert opinion

and commentaries are all considered for publication. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
