SMAGP a Novel Biomarker of Cervical Cancer Development and Progression [Erratum]

On page 6933, Figure 4B artwork is incorrect. Figure 4B artwork was mistakenly interchanged by the Editorial staff during the publication process. The correct Figure 4 is as follows:

Figure 4 SMAGP down-regulation inhibited the migration and invasion ability of cervical cancer cells.

Notes: (A, B) SMAGP was knocked down with siRNA (siNC and si581) and lentivirus (shNC, shSMAGP). Knockdown of SMAGP inhibited CaSki cell migration and invasion. (C) Knockdown of SMAGP inhibits CaSki metastasis in nude mice. CaSki cells stably expressing shSMAGP were injected into nude mice twice per week. At 28 days after injection, the tumor mass and related tissues were removed. In the NC group, many tumors were found around the intestine; however, tumors only developed at the injection site in the experimental group. Ascites extracted from the NC group exhibited green fluorescence. **P<0.01, ***P<0.001. Magnification 100×.

Abbreviation: NC, normal cells.
