LncRNA PLAC 2 is Downregulated in Osteosarcoma and Regulates Cancer Cell Proliferation Through miR-93 [Erratum]

Sun X, Yu L, Shi Y, Guo W. *Cancer Manag Res.* 2020;12:3623—3629.

during the publication process. The correct Figure 3 is shown below.

The authors have advised that Figure 3 on page 3627 is incorrect. This error was introduced by the Editorial staff

Figure 1 Overexpression of PLAC 2 led to downregulated miR-93 in MG-63 and U2OS cells. MG-63 and U2OS cells were transfected with miR-93 mimic or PLAC 2 expression vector to analyze the interactions between PLAC 2 and miR-93. Overexpression of PLAC 2 and miR-93 was confirmed at 24 h post-transfection (A). The effects of overexpression of PLAC 2 on miR-93 (B) and the effects of overexpression of miR-93 on PLAC 2 (C) were also analyzed by qPCR at 24 h post-transfection. ANOVA (one-way) and Tukey's test were used to compare the mean values from 3 biological replicates (A). C, control cells without transfection; NC, negative control cells transfected with empty vector or NC miRNA; * $p < 0.05$.
