CORRIGENDUM

Comparison of Respiratory Variations of Subclavian Vein and Inferior Vena Cava in Hospitalized Patients with Kidney Disease [Corrigendum]

Kaptein EM, Cantillep A, Kaptein JS, et al. *Int J Nephrol Renovasc Dis.* 2020;13:329–339.

Page 332, right column, line two, the text “reduces” should read “increases”. The correct sentence should read as “With mechanical ventilation, positive intrathoracic pressure during

inspiration reduces the venous return, which increases the IVC diameter, and during expiration the lower intrathoracic pressure increases the venous return which decreases IVC diameter at end-expiration”.

The authors apologize for this error.

International Journal of Nephrology and Renovascular Disease

Dovepress

Publish your work in this journal

The International Journal of Nephrology and Renovascular Disease is an international, peer-reviewed open-access journal focusing on the pathophysiology of the kidney and vascular supply. Epidemiology, screening, diagnosis, and treatment interventions are covered as well as basic

science, biochemical and immunological studies. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
