

miR-489-3p Inhibits Prostate Cancer Progression by Targeting DLX1 [Retraction]

Bai P, Li W, Wan Z, et al. *Cancer Manag Res.* 2020;12:2719–2729.

At the request of the author, the Editor and Publisher of *Cancer Management and Research* wish to retract the published paper.

Following a review of their study the authors were unable to repeat the results described in the published paper for subsequent experiments. As a result, the authors can no longer confirm that overexpression of miR-489-3p was able to suppress luciferase activity by transfection with an miR-489 expression plasmid. The authors also found an error in Figure 6. The image used for Figure 6A Panel 22Rv1 miR-489-3p had been duplicated with the image used for Figure 6C 22Rv1 miR-489-3p+DLX1. In the

interests of scientific integrity, the authors have determined it best to retract the published article.

The Editor has determined the findings of the paper are no longer valid and has agreed with the authors request to retract the article.

The author wished to apologise for this error.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

Cancer Management and Research is an international, peer-reviewed open access journal focusing on cancer research and the optimal use of preventative and integrated treatment interventions to achieve improved outcomes, enhanced survival and quality of life for the cancer patient.

The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.

Submit your manuscript here: <https://www.dovepress.com/cancer-management-and-research-journal>
