

Doxorubicin-Loaded Poly (Lactic-Co-Glycolic Acid) Nanoparticles Coated with Chitosan/Alginate by Layer by Layer Technology for Antitumor Applications [Corrigendum]

Chai F, Sun L, He X, et al. *Int J Nanomedicine*. 2017;12:1791—1802.

The authors wish to apologize for this error and advise that this does not change the conclusions of the paper.

The authors have advised that the wrong images for Figure 6 on page 1798 were used. The correct Figure 6 is as follows.

Figure 6 TEM images of **(A)** bare doxorubicin-poly (lactic-co-glycolic acid) nanoparticles and **(B)** core-shell particles with (chitosan/alginate)₃.
Abbreviation: TEM, transmission electron microscopy.

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine,

Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
