Antibacterial Properties of PEKK for Orthopedic Applications [Corrigendum]

The authors have advised Figure 7 on page 6475 is incorrect. The authors inadvertently included a duplicate image for the live/dead Staphylococcus epidermidis and Pseudomonas aeruginosa PEEK samples shown in Figures 6 and 7, respectively. The correct Figure 7 is as follows.

![Figure 7](image_url)

**Figure 7** Live/dead assay of *Pseudomonas aeruginosa* attached on (A) PEEK and (B) PEKK samples (SYTO® 9 and propidium iodide respectively stained live [green] and dead [red] bacteria cells).

**Notes:** No red stained bacteria observed in these images. Scale bars =50 microns.

**Abbreviations:** PEEK, poly-ether-ether-ketone; PEKK, poly-ether-ketone-ketone.
