Long Noncoding RNA SNHG7, a Molecular Sponge for microRNA-485, Promotes the Aggressive Behavior of Cervical Cancer by Regulating PAK4 [Retraction]

Wu F, Sui Y, Wang Y, Xu T, Fan L, Zhu H. *Onco Targets Ther.* 2020;13:685–699.

The Editor and Publisher of *OncoTargets and Therapy* wish to retract the published article. Concerns were raised regarding the integrity of the tumor data presented in Figure 7B and the alleged duplication of images in Figure 2C with similar images from unrelated studies, specifically:

- Figure 2C panel C-33A, si-NC appears to have been duplicated with a similar image in Figure 2C from Gao et al, 2020 (<https://doi.org/10.1080/15384101.2020.1749466>).

The authors responded to our queries but were unable to provide an explanation for the alleged image duplication and could not provide the original raw data for their study and have therefore agreed to retract the article.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic

agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
