## CORRIGENDUM

## **Clinical Significance of the HHLA2 Protein in Hepatocellular Carcinoma** and the Tumor Microenvironment [Corrigendum]

Luo M, Lin Y, Liang R, Li Y, Ge L. J Inflamm Res. 2021;14:4217-4228.

4222, Page Microenvironment and Prognosis in HCC section, the text "Based on Teng et al,29 we defined four types of tumor microenvironment: type I ("adaptive immune resistance", HHLA2 - high TILs +), which lacked HHLA2 and show intermediate or high TIL density, was observed in 77 of the 202 HCC tissues (38.1%); type II ("immunologic ignorance", HHLA2 - low TILs -), which lacked HHLA2 and showed low TIL density, was observed in 10 cases (5.0%); type III ("intrinsic induction", HHLA2 - high TILs -), which lacked HHLA2 and showed intermediate or high TIL density, was observed in 26 cases (12.9%); and type IV ("tolerance", HHLA2 - low TILs +), which lacked

HHLA2 and low TIL density, was observed in 89 cases (44.0%)" should read "Based on Teng et al,<sup>29</sup> we defined four types of tumor microenvironment: type I ("adaptive immune resistance", HHLA2 - high TILs +), which expressed high HHLA2 and showed intermediate or high TIL density, was observed in 77 of the 202 HCC tissues (38.1%); type II ("immunologic ignorance", HHLA2 - low TILs -), which lacked HHLA2 and showed low TIL density, was observed in 10 cases (5.0%); type III ("intrinsic induction", HHLA2 - high TILs -), which expressed high HHLA2 and showed low TIL density, was observed in 26 cases (12.9%); and type IV ("tolerance", HHLA2 - low TILs +), which lacked HHLA2 and showed intermediate or high TIL density, was observed in 89 cases (44.0%)".

The authors apologize for this error.

## Journal of Inflammation Research

Publish your work in this journal

The Journal of Inflammation Research is an international, peer-

reviewed open-access journal that welcomes laboratory and clinical

findings on the molecular basis, cell biology and pharmacology of

inflammation including original research, reviews, symposium

reports, hypothesis formation and commentaries on: acute/chronic

inflammation; mediators of inflammation; cellular processes; molecular

mechanisms; pharmacology and novel anti-inflammatory drugs; clinical conditions involving inflammation. The manuscript management system is completely online and includes a very quick and fair peerreview system. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
