Osseointegration of Layer-by-Layer Polyelectrolyte Multilayers Loaded with IGF1 and Coated on Titanium Implant Under Osteoporotic Condition [Retraction]

The Editor and Publisher of *International Journal of Nanomedicine* wish to retract the published article. Concerns were raised regarding the alleged duplication of images in Figures 1 and 5, specifically:

- Figure 1A, panel TNS-PEM (x50,000) appears to have been duplicated with regions of panel TNS-PEM-IGF1-100 (x50,000).
- Figure 5A, panel TNS-PEM (14 d), TNS-PEM-IGF1-50 (14 d) and TNS-PEM-IGF1-100 (14 d) all appear to have been duplicated with regions of each other.
- Figure 5B, panel TNS (21 d), TNS-PEM (21 d), TNS-PEM-IGF1-50 (21 d) and TNS-PEM-IGF1-100 (21 d) all appear to have been duplicated with regions of each other.

The authors responded to our queries but were unable to provide a satisfactory explanation for the alleged duplication and could not provide satisfactory original data that would validate the findings of their study. The Editor advised for the article to be retracted.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

*The International Journal of Nanomedicine* is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine, Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit [http://www.dovepress.com/testimonials.php](http://www.dovepress.com/testimonials.php) to read real quotes from published authors.
