

Implementation of PPI with Nano Amorphous Oxide Semiconductor Devices for Medical Applications [Retraction]

Dai M, Wu Z, Qi S, et al. *Int J Nanomedicine*. 2020;15:1863–1870.

The Authors, Editor and Publisher of *International Journal of Nanomedicine* have agreed to retract the published article. Concerns were raised by the Editor following the authors request to make several corrections to the published article. Many of the requested corrections related to data descriptions in the Materials and Methods and the Results and Discussion. Readers should note the Editor confirms the retraction is not due to academic misconduct but owing to the number of corrections reported within the article which were too numerous to be corrected

in a standard corrigendum. The authors may consider republishing a corrected version of the article. The authors agreed with the decision to retract the article to maintain the preciseness of the publication record and wish to apologise for the number of corrections that were reported.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine,

Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
