Radiolabeling and Preliminary Evaluation of ^{99m}Tc-Labeled DNA Cube Nanoparticles as Potential Tracers for SPECT Imaging [Corrigendum]

Duan X, Du Y, Wang C, Zhao Z, Li C, Li J. Int J Nanomedicine. 2021;16:5665–5673

Following a review of the paper post-publication, the authors realized that Figure 2, first used in a doctoral dissertation, was used again in their published paper. The experiment involved in Figure 2 is already well established in their research group, they have obtained new results, which are similar to the results of the original Figure 2. The authors redid the experiment, a corrected version of Figure 2 on page 5669 should be presented as follows:

The authors affirm that the new results have no impact on the final conclusions of the article and apologize to the readers for any inconvenience originating from this error.

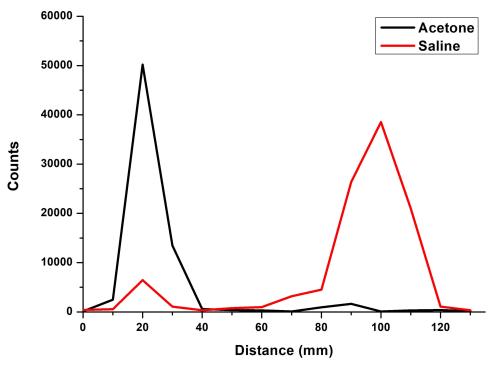

Figure 2 Radio-TLC image of 99mTc-MAG3-ssDNA (A20) under 2 developing system. Black line: 100% Acetone; Red line: 0.9% saline.

International Journal of Nanomedicine

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch[®], Current Contents[®]/Clinical Medicine, Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http:// www.dovepress.com/testimonials.php to read real quotes from published authors.
