

The Vicissitude of Do Not Attempt Cardiopulmonary Resuscitation (DNACPR) Order During COVID-19 Pandemic in Japan – A Retrospective Cohort Study [Corrigendum]

Morishita, Iwata. *Int J Gen Med*. 2022;15:3943—3950.

On page 3947, fourth paragraph, first sentence, the text “Among those who had confirmed code status after admission, the mortality was higher among those who were given DNACPR orders than those on full code (52.7% vs 23.8%, $P < 0.0001$)” should read “Among those who had confirmed code status after admission, the mortality was higher among those who were given DNACPR orders than those on full code (26.9% vs 12.5%, $P < 0.0001$)”.

The authors apologize for the error.

Publish your work in this journal

The International Journal of General Medicine is an international, peer-reviewed open-access journal that focuses on general and internal medicine, pathogenesis, epidemiology, diagnosis, monitoring and treatment protocols. The journal is characterized by the rapid reporting of reviews, original research and clinical studies across all disease areas. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
