Long Non-Coding RNA BLACAT1 Promotes the Tumorigenesis of Gastric Cancer by Sponging microRNA-149-5p and Targeting KIF2A [Retraction]

At the authors request, the Editor and Publisher of Cancer Management and Research wish to retract the published article. The authors contacted the journal to raise concerns that the results described in the article were unreproducible. The authors also confirmed that they were unable to provide any of the original data for their study. In addition, the authors were also unable to provide an explanation for the alleged image duplication in Figures 2 and 4. Specifically, 

- Figure 2D, MKN45, si-BLACAT1-1 appears to have been duplicated with the same image from Figure 4D, MKN45, miR-149-5p mimics.

The authors requested to retract the article and the Editor agreed with this decision.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Cancer Management and Research

Publish your work in this journal

Cancer Management and Research is an international, peer-reviewed open access journal focusing on cancer research and the optimal use of preventative and integrated treatment interventions to achieve improved outcomes, enhanced survival and quality of life for the cancer patient. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
