CORRIGENDUM

A Multicenter 12-Month Retrospective Evaluation of Canaloplasty and Trabeculotomy in Patients with Open-Angle Glaucoma: The ROMEO 2 Study [Corrigendum]

On page 3043, the second sentence of the Introduction, “The study was the basis of the FDA approved OSS indication to reduce IOP in adult patients with open-angle glaucoma.” should read “The study was the basis of the FDA cleared OSS indication to reduce IOP in adult patients with primary open-angle glaucoma.”

The authors apologize for this error and advise it does not affect the results of the paper.
