At the authors request, the Editor and Publisher of *OncoTargets and Therapy* wish to retract the published article. The first author (Gao G) has informed the journal that they published the same article (https://doi.org/10.1186/s12935-021-02058-9) with the journal, *Cancer Cell International*, without notifying either journal of the dual submission. The author (Gao G) has acknowledged that he used the same or highly similar data from the original manuscript that was used for the article published in *Cancer Cell International* without the consent of his co-authors. The submission was then made to *OncoTargets and Therapy* after altering the author list without the knowledge of his co-authors.

The Editor has agreed to the authors request to retract the article.

We have been informed in our decision-making by our policy on publishing ethics and integrity and the COPE guidelines on retractions.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

**Publish your work in this journal**

*OncoTargets and Therapy* is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
