Exosomal Tenascin-c Induces Proliferation and Invasion of Pancreatic Cancer Cells by WNT Signaling [Retraction]

The Editor and Publisher of OncoTargets and Therapy wish to retract the published article. Concerns were raised following the authors request to replace invasion and migration images in Figure 4. It appears images in this figure may have been duplicated. Specifically,

- Figure 4A, Invasion, PC-10, appears to have been duplicated with the same image for Figure 4A, Migration, PC-10.
- Figure 4A, Invasion, Aspc-1, appears to have been duplicated with the same image for Figure 4A, Migration, PC-10.

The authors were asked to provide original data that would further verify the reported findings, but they were unable to do this in a satisfactory manner. The Editor requested to retract the article and the authors were notified of this.

We have been informed in our decision-making by our policy on publishing ethics and integrity and the COPE guidelines on retractions.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

OncoTargets and Therapy

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
