Hopea odorata Extract Inhibits Hepatocellular Carcinoma via Induction of Caspase-Dependent Apoptosis [Erratum]

An error during the preparation of Figure 1 for publishing led to the inadvertent creation of a duplicate region in figure part 1A on page 5767. The journal wishes to apologise for this error. The correct version of Figure 1 is shown below.

Figure 1 Isolation of fibroblasts from skin tissue.
Notes: Skin tissue after collection from hospital was cut into small pieces and laid on the surface of culture Roux. After 10 days, cells were grown from the edge of the skin fragment (A). After 15 days, cells proliferated and spread out on the surface of culture Roux (B).
