Fabrication and Characterization of Glimepiride Nanosuspension by Ultrasonication-Assisted Precipitation for Improvement of Oral Bioavailability and in vitro α-Glucosidase Inhibition [Retraction]

The Editor and Publisher of International Journal of Nanomedicine wish to retract the published article. Concerns were raised about the alleged duplication of regions within the image used in Figure 4A. The authors did respond to our queries but were unable to provide a satisfactory explanation for the alleged duplication. In addition, further analysis of the original image used in Figure 4A indicates that regions within the image may have been altered. The Editor determined that the findings reported in the article were unreliable and requested for the article to be retracted. The authors were notified of this.

We have been informed in our decision-making by our policy on publishing ethics and integrity and the COPE guidelines on retractions.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

International Journal of Nanomedicine

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine, Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
