Silencing of Long Non-Coding RNA Colon Cancer-Associated Transcript 2 Inhibits the Growth and Metastasis of Gastric Cancer Through Blocking mTOR Signaling [Retraction]

The Editor and Publisher of OncoTargets and Therapy wish to retract the published article. Concerns were raised regarding the alleged duplication of cell colony images in Figure 4 with the same images from Figure 9. Specifically,

- Figure 4A, HGC-27, Control, appears to have been duplicated with the same image for Figure 9C, siRNA-NC+Leu, which has been flipped.
- Figure 4A, HGC-27, siRNA-NC, appears to have been duplicated with the same image for Figure 9C, Control, which has been flipped.
- Figure 4A, HGC-27, siRNA-CCAT2, appears to have been duplicated with the same image for Figure 9C, siRNA-CCAT2+Leu, which has been flipped.
- Figure 4B, HGC-27, Control, appears to have been duplicated with the same image for Figure 9D, siRNA-CCAT2+Leu, which has been flipped.
- Figure 4B, HGC-27, siRNA-NC appears to have been duplicated with the same image for Figure 9D, siRNA-NC+Leu, which has been flipped.
- Figure 4B, HGC-27, siRNA-CCAT2, appears to have been duplicated with the same image for Figure 9D, Control, which has been flipped.

The authors did not respond to our queries and no explanation for the alleged image duplication was provided. The Editor determined the reported study to be unreliable and requested for the article to be retracted. The authors were notified of this.

We have been informed in our decision-making by our policy on publishing ethics and integrity and the COPE guidelines on retractions.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

OncoTargets and Therapy

Publish your work in this journal

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http://www.dovepress.com/testimonials.php to read real quotes from published authors.
