

General Theory of Inflammation: Patient Self-Administration of Hydrocortisone Safely Achieves Superior Control of Hydrocortisone-Responding Disorders by Matching Dosage with Symptom Intensity [Corrigendum]

Irwin JB, Baldwin AL, Stenberg VI. *J Inflamm Res.* 2019;12:161-166.

The authors have advised that a Funding statement was missed from page 166 of the published paper. The funding statement should read as follows:

Funding

This study was supported by the Helen Foundation.

The authors also wish to update the Disclosure statement on page 166. The text “The authors report no conflicts of interest in this work” should read “Virgil I Stenberg reports that he is the Research Director at the Helen Foundation. The authors report no other conflicts of interest in this work”.

Publish your work in this journal

The Journal of Inflammation Research is an international, peer-reviewed open-access journal that welcomes laboratory and clinical findings on the molecular basis, cell biology and pharmacology of inflammation including original research, reviews, symposium reports, hypothesis formation and commentaries on: acute/chronic inflammation; mediators of inflammation; cellular processes; molecular mechanisms; pharmacology and novel anti-inflammatory drugs; clinical conditions involving inflammation. The manuscript management system is completely online and includes a very quick and fair peer-review system. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
