MicroRNA-188-5p Promotes Epithelial–Mesenchymal Transition by Targeting ID4 Through Wnt/β-Catenin Signaling in Retinoblastoma

[Retraction]

We, the Editors and Publisher of OncoTargets and Therapy, have retracted the following article.

Concerns were raised about the integrity of the data in the article after it was found images from Figure 3 had been duplicated with those from other unrelated articles. Specifically,

- In addition, the image for Figure 3E, 188-5p has been duplicated with the image for Figure 3H, SH ID4.

The authors did not respond to our queries and were unable to provide an explanation for the duplicated images or provide data for the study. As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article and the authors were notified of this.

We have been informed in our decision-making by our editorial policies and COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as ‘Retracted’.
