Research on Correlations of miR-196a Expression with Progression and Prognosis of Cutaneous Squamous Cell Carcinoma [Retraction]

We, the Editors and Publisher of *Clinical, Cosmetic and Investigational Dermatology*, have retracted the following article.

Following publication of the article, concerns were raised about the duplication of images from Figure 4 with images from other unrelated articles. Specifically,

The authors did not respond to our queries and were unable to provide an explanation for the duplicated images or provide data for the study. As verifying the validity of published work is core to the integrity of the scholarly record, we are therefore retracting the article and the authors were notified of this.

We have been informed in our decision-making by our editorial policies and COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as ‘Retracted’.
